HISHAM AL HAFEZ

Senior Frontend Developer | Vue.js, Nuxt.js, TypeScript & AI-Enabled SaaS

Madrid, Spain | +34 679 288 907 | hisham.hafez96@outlook.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Senior Frontend Developer with 7+ years of experience building production web and mobile applications for international teams. Specialized in Vue 3, Nuxt.js, TypeScript, Vuetify and Pinia, with full-stack experience across Directus, Laravel, REST APIs and relational databases. Experienced in complex healthcare scheduling, LLM/RAG integrations, automated testing, code review and CI/CD, with a track record of delivering maintainable features across frontend, backend and product workflows.

TECHNICAL SKILLS

Frontend: Vue.js, Nuxt.js, TypeScript, JavaScript, Vuetify, Pinia, Angular, HTML5, CSS3, SCSS, Tailwind CSS.

Backend & Data: Directus, Node.js, PHP, Laravel, REST APIs, PostgreSQL, MySQL, Firebase.

AI & Developer Tools: LLM integration, retrieval-augmented generation (RAG), context/prompt engineering, Claude Code, AI-assisted development.

Testing & Delivery: Cypress, Vitest, end-to-end testing, Docker, Git, Bitbucket Pipelines, CI/CD, Jira, pull-request review.

Mobile, CMS & Payments: Flutter, Ionic, WordPress, Elementor, Stripe, in-app purchases, Iyzico, Figma.

PROFESSIONAL EXPERIENCE

SEDIDOC GmbH | Germany - Remote — Jun 2022 - Present

Full-Stack Developer - Frontend Focus

Core stack: Vue 3, Nuxt.js, TypeScript, Vuetify, Pinia, Directus, PostgreSQL, Cypress, Vitest, Docker

- Develop and maintain SEDIWORK, a healthcare SaaS platform for hospital workforce and rotation planning, including an integrated LLM-powered assistant and complex scheduling and organizational workflows.
- Build planning features covering staff assignments, time periods, validation, conflict handling, substitutions, notifications, plan publication and interactive clinic structures.
- Develop an LLM-powered assistant using structured application context, retrieval-augmented generation (RAG), system prompts and typed frontend-backend contracts to provide grounded planning answers.
- Deliver end-to-end changes across Vue/Nuxt components, Pinia stores, shared TypeScript types, Directus services, custom API endpoints, PostgreSQL-backed workflows, tests and technical documentation.
- Create and maintain Cypress and Vitest coverage, investigate CI-specific failures and race conditions, and validate changes against functional and regression risks.
- Review pull requests daily across frontend and backend changes, evaluating functionality, architecture, test coverage and maintainability while contributing to technical design discussions.
- Maintain SEDIDOC's public WordPress website, including event and company content, responsive UI improvements, SEO, performance and production stability.

DISHIFY LTD | United Kingdom - Remote, Part-Time — May 2024 - Present

Software Engineer

Core stack: Flutter, Dart, Firebase, REST APIs, AI services, Stripe, in-app purchases

- Develop a Flutter mobile application for AI-powered meal planning and recipe experiences, with a strong focus on onboarding, animation and responsive mobile UX.
- Integrate frontend flows with AI services, Firebase authentication, real-time data and REST APIs to deliver personalized and dynamic content.
- Implement and maintain subscription and payment workflows using Stripe and mobile in-app purchases.

PROFESSIONAL EXPERIENCE - CONTINUED

AdviseCampus | Istanbul, Turkey - Part-Time **Sep 2023 - Jan 2025**

Full-Stack Developer

Core stack: Angular, Directus, Laravel, Stripe

- Developed a web platform supporting students seeking consultation and admission guidance for international higher education.
- Built Angular interfaces with pagination, search, filtering and frontend/backend form validation to improve navigation and submission accuracy.
- Structured and connected Directus data with frontend features and Laravel services, including transactional email and notification workflows.
- Integrated Stripe payments and delivered end-to-end features such as a student-loan application flow and an English test with scoring, result emails and personalized certificates.
- Guided and collaborated with a junior frontend developer, supporting implementation decisions, task delivery and code quality.

MIDADTEK | Istanbul, Turkey **Mar 2019 - May 2022**

Software Engineer

Core stack: Angular, Ionic, TypeScript, Firebase, REST APIs, WordPress, Stripe, Iyzico.

- Built responsive web and mobile applications using Angular and Ionic, creating reusable UI components and consistent design patterns across products.
- Delivered features for healthcare, education and service platforms, including authentication, role-based dashboards, booking, prescriptions, shipment tracking, notifications and search/filter workflows.
- Integrated Firebase, REST APIs and payment services, and created WordPress websites with responsive layouts, custom forms, SEO improvements and production support.

Loxiy | Istanbul, Turkey - Remote, Part-Time **Sep 2020 - Oct 2021**

Software Engineer

- Developed, launched and maintained the company website, focusing on responsive presentation, content structure and production reliability.

SELECTED PROJECTS & LINKS

SEDIWORK - Healthcare workforce and rotation-planning SaaS built with Vue, Nuxt, Vuetify and Directus, including complex scheduling workflows and an integrated LLM assistant.

AdviseCampus - International education platform built with Angular, Directus and Laravel, including Stripe payments, student-loan applications and automated English-test results.

DISHIFY - AI-powered meal-planning mobile application developed with Flutter, Firebase and subscription and payment integrations.

ASEPHA - Healthcare application featuring appointment booking, prescription management, shipment tracking and payment-card workflows.
